Secure Alphanumeric Keypad

EMV Ready Solutions

Bring your truck stop into the modern payment age! With Gilbarco's Secure Alphanumeric dispensers, you get an encrypted pin pad capable of alphanumeric transactions, ready to fulfill all of your fleet needs, along with a card reader capable of processing secure EMV chip card payments. Now integrated with all major fleet Point-of-Sale Solutions and Pump Controllers, Gilbarco's Secure Alphanumeric is the simple and trusted path to EMV compliance for your diesel high flow and DEF customers.

Modernize and Future-proof Your Truck Stop

Gilbarco's Secure Alphanumeric dispensers bring modern forecourt technology to the backcourt to delight your fleet fuelers. Modern technology that can communicate over high speed Internet Protocol connections, like contactless card readers, 2D barcode scanners, remote management, and customizable media solutions delivering content securely from a cloud environment, are now a reality at the truck stop. Drive repeat business, loyalty, and in-store traffic from the backcourt and see what marketing techniques and offers are working with real-time analytics, all from the comfort and security of your own cloud-based, PCI-compliant web portal.

Modern Payment

Pump up your security quotient with the industry's most secure payment platform for fuel dispensers. Gilbarco's Secure AN FlexPay IV CRIND, now available for truck stops, includes both physical and logical security features to help secure your dispenser from theft and fraud with its EMV Chip Hybrid Card Reader. The Secure Alphanumeric FlexPay IV CRIND also supports Contactless, or Tap and Go, payment.

Media Solutions

Now that you can get an engaging large color screen on your backcourt, why not use it? Gilbarco offers two different media solutions. Encore Experience offers the most customizable consumer experience, where you can select, design and deploy different applications from a cloud-based web portal. Applause TV leverages a partnership with GSTV to generate engaging content to drive consumers into the store.

Remote Management

Cloud connectivity comes to the backcourt with maximum control, data retrieval, and fuel dispenser visibility. Additionally, Insite360 Encore's premium tier includes enhanced security, customizable alerts, and remote upgrades. All of these features and more are designed to help your business save cost by eliminating downtime through remote features.
