

Software Release Version 10.D

TLS-450PLUS and TLS4 Series Consoles

Purpose

This document announces the release of version 10.D software for the TLS-450PLUS and TLS4 series consoles.

► Performance Enhancements

Centralized Device Management (CDM) – New Feature Supported

- Change Management is a new feature that offers the following functionality: receive hourly or daily notifications when changes are made to consoles on a network; receive CDM-specific notifications of software restarts, plan failures, and loss of console communications.

Ongoing Improvements

- Version 10.D includes miscellaneous bug fixes and updates.

► Software Upgrade Kit – TLS-450PLUS, TLS4 Series Consoles

Software upgrades are always free to download on our website at veeder.com/us/software-downloads.

Software upgrades can also be ordered on a USB Flash drive at no charge by ordering the software kit part number in the table below:

Part Number	Description	List Price
0330020-744	TLS-450PLUS, TLS4 Series Operating Software Upgrade	No Charge

► Documentation

For more information on CDM, visit veeder.com/us/cdm. Manual information is available at veeder.com/us/technical-document-library.
