What is EVerse?

Launch, scale and optimize your EV charging business with EVerse™, the EV charging management platform designed exclusively for fuel retailers.

Leveraging the latest cloud technology, EVerse facilitates seamless, integrated EV charging management for fuel retail networks. An optional EVerse driver app enriches your service offering while unlocking powerful data and revenue generating opportunities.

PROVEN PERFORMANCE

- ∞ 10,000+ plugs managed
- ∞ 170+ different charger types
- ∞ Used by over 700,000 drivers
- ∞ Present in 18 countries
- ∞ 10 million+ charging transactions supported

*Figures based on software vendor data

Why EVerse?

SIMPLE | Off-the-shelf solution

EVERse takes the stress and hassle out of electrifying your network. Backed by all the tools you need to build EV charging into your business, EVERse can get your charging operation online and profitable in no time.

Part of our unique end-to-end solution

From hardware, to software, and all the advice and support in between, our in-house e-Mobility team have you covered.

Charging Management Software

Powerful, hardware agnostic technology

EV Charging Hardware

Wide range of EV chargers from 7kW to 350kW

e-Mobility Expertise

Outstanding support and consultancy at every step of the way

Aftermarket Support

Long-established installation, service and maintenance network

SEAMLESS | Integration

EVERse has been designed for total integration peace of mind. As a trusted partner to tens of thousands of forecourts worldwide, we know the importance of business continuity, and are skilled at integrating new devices and technology into our customers' networks.

- ∞ Open Charge Point Protocol (OCPP) for complete hardware flexibility
- ∞ Integration capability compatible with forecourt ecosystems
- ∞ Multiple customization options for seamless integration into existing corporate branding
- ∞ Onboarding, integration and aftersales support from the forecourt e-Mobility experts

SCALABLE | Ready for an electric future

EVerse is flexible, scalable and ready to meet all your EV charging needs today and tomorrow. Compatible with a wide range of charging systems, EVerse is ready to support the future of mobility and facilitate charging for current and future EVs.

- ∞ Compatible with a wide range of L2 and DC chargers
- ∞ Multiple payment methods supported

- ∞ Set your own pricing (such as by kWh or minutes)
- ∞ Modular software platform: add additional modules as you go
- ∞ Control energy use through energy management and reporting
- ∞ Option to white label with your own corporate branding as your network grows

SENSIBLE |

A sound investment, today & in the future

EVerse makes financial business sense. Open up your network to new revenue streams, boosting profitability further through reduced maintenance costs and low total cost of ownership.

- ∞ Retain existing customers as they transition to EV
- ∞ Open up your forecourt to new customer groups
- ∞ Translate increased dwell times into more c-store purchases
- ∞ Proactive charger health monitoring and self healing algorithm keeps service and maintenance costs to a minimum

600 EV models

will be launched in the next 5 years

More than 450

will be pure battery electric vehicles (BEVs)

~\$120 billion

of global investment in battery electric vehicles by 2025

25-30%

of car manufacturer investment will be battery electric vehicle related

Powerful data at your fingertips

EVERse Network Software: A back office solution like no other

Delivering a stable, cost-effective, and competitive EV charging network requires a unique set of tools that are purpose built for EV charging.

EVERse offers an intuitive and **cloud-enabled host dashboard that allows complete 24/7 visibility** over your charging operations. With just a few clicks, you can monitor, manage and optimize your charger network from anywhere, at any time.

A powerful and extremely **configurable EV charging billing engine, that is not found in regular fuel retail point of sale (POS systems)**, offers maximum flexibility, accessibility, and, ultimately profitability.

At the same time, **EVERse keeps your charging network up and running**, reducing downtime and maintenance costs, through innovative always-on technology that continually scans for potential issues, troubleshooting and fixing without human intervention wherever possible.

Operational Flexibility and Optimization

∞ Real-time, remote charger monitoring and insights

∞ Flexible payments options with the ability to:

- Offer payment via an EV driver app
- Configure unique prices
- Payment options for both registered and first time or non-registered users

∞ Energy management and cost control options

Charger Stability and Availability

∞ Real-time charger availability information for drivers (via the driver app)

∞ Fast and proactive issue tracking and resolution

∞ Real-time auto fault alerts

∞ Self-healing capabilities

∞ Call center support options (for EV driver support, with remote restart capabilities)

= MAXIMIZE PROFITABILITY

EVERse Driver App

Boost your e-Mobility offering and unlock powerful EV driver insights when you combine the **EVERse charger management platform** with the **EVERse driver app**.

Benefits for the driver

- ∞ Help to locate local charging stations
- ∞ Easy way to initiate and pay for charging
- ∞ Smooth charging transaction
- ∞ Seamless customer experience

Benefits for your network

- ∞ Open your network to new customers
- ∞ Enhance your brand recognition
- ∞ Boost your green credentials
