VEEDER-ROOT

End of Life Notification
TLS-350 Series ATG Systems in California

Overview

ATG Series 8482
Veeder-Root is committed to providing the highest quality products and services to our customers. As the world leaders in the development of fueling system technology, we view product End of Life (EOL) as part of the natural cycle that drives technology evolution.
Now that the TLS-450PLUS ATG meets CARB requirements for VR-202-AD, VR-203-AC, and VR-204-AC, Veeder-Root will discontinue producing TLS-350 ATGs to meet the Enhanced Vapor Recovery (EVR) and In-Station Diagnostic (ISD) requirements **effective November 15, 2023**.

These systems have reached the point in their sales cycle where manufacturing the products are no longer feasible due to obsoleted components and increased costs for older technologies.

▶ Targeted Market

North America – California

▶ Transition Details

Product Transition Information
We recommend customers transition to the Veeder-Root TLS-450PLUS consoles with EVR/ISD capability for their tank monitoring needs. See the Product Transition Information section on the next page for more information.

Purchase Orders for TLS-350 Spare Parts
Veeder-Root will support spare parts through 2025, or when spare parts are no longer available, whichever comes first.

Please contact Customer Service at customerservice@veeder.com.
