VEEDER-ROOT

Software Release Version 10.J
TLS-450PLUS and TLS4 Series Consoles

Purpose

This document announces the release of version 10.J software for the TLS-450PLUS and TLS4 series consoles.

▶ Performance Enhancements

HydrX™ Fuel Conditioning System
- HydrX GUI, Web, and RS232 Commands
  - The individual GUI, Web, and RS232 Commands were translated into the 15 languages supported in the TLS-4xx
- HydrX Vacuum Alarm Debounce
  - Added intelligent operation to remove unwanted input noise for the vacuum alarm
- HydrX Drain Warning
  - A new drain warning to alert the user when the HydrX water reservoir is 80% full, but not high enough to trigger the existing drain alarm

Ongoing Improvements
- Version 10.J includes miscellaneous bug fixes and updates

▶ Software Upgrade Download – TLS-450PLUS and TLS4 Series Consoles

Software upgrades are always free to download on our website at **veeder.com/us/software-downloads**.

▶ Documentation

For more information on the software download process, refer to **TLS-450PLUS/TLS4 Operator's Manual (577014-110)**.
