

Insite360 Supply

Automate fuel planning, sourcing and dispatching.

Insite360 Supply

Fuel delivery is a critical element of keeping your customers coming back to your site.

Monitor • Manage • Optimize

Fuel delivery is one of the most important aspects of station operation when it comes to customer satisfaction. The reduction or elimination of run out/retains is the key to keeping customers returning for the fill ups. With Insite360 Supply, you gain access to powerful tools that help protect your reputation by allowing you to monitor inventory levels, manage delivery of new wetstock, and optimize replenishment all while reducing the overall manual burden on your operations team.

See the Future

Insite360 Supply allows you to reduce time on deliveries that might interfere with operations. Know exactly when deliveries will be made with in truck tracking. Verify that the load will fit in the tank with digital ATG polling and handle any last-minute changes by instantly contacting the driver all from the same application. You can even calculate demurrage fees directly in the application.

Maximum Gallon Return

Delivery logistics allows your business to go from rack to cash in record time by eliminating costly manual invoicing processes and below ground safety stock that plagues most site operators. By utilizing real-time visibility to inventory, trucks and forecasting Insite360 allows you to free up

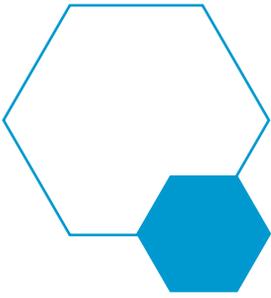

capital for other expenses that would otherwise be tied up. Utilizing this system allows for the maximum return on every gallon sold by your sites all while reducing overhead.

Contract Compliance

Insite360's proprietary sourcing solution allows your business to get the best price for every gallon purchased all while meeting your contractual obligations. This combined with automated purchasing, tracking, and BOL matching is one less thing that your sourcing teams need to worry about. Our replenishment optimization can be customized to any sites needs on time, amount, or any number of other factors unique to your specific case.

Grow Your Team

Insite360 Supply is available as a do-it-yourself platform or as a managed service. Insite360's Fuel Center Team of seasoned professionals can help you reduce fuel costs and gain greater visibility into the volatile fuel market all while helping you meet your fuel contract obligations. On average Fuel Center customers save upwards of \$0.06 per gallon.

Insite360 brings fuel retailing into the future with powerful technology and analytics empowering global fuel retailers and commercial operators to optimize fuel logistics and pricing; proactively manage environmental compliance; precisely monitor fuel inventory and operations; improve equipment performance; drive improved outcomes using visibility and insights.

Why Insite360
