* Standard fuel can not be dispensed through the same hose as flexible fuels.

Build your brand.

And your bottom line.

Encore® S for Canada

Gilbarco Veeder-Root's Encore® S is the leading fuel dispenser choice in Canada for good reason. It's the best choice for your business success thanks to its quality, security, flexibility and connectivity. The high-quality, durable design provides reliable performance and enduring attractiveness, even in extreme conditions. You'll enjoy the lowest total cost of ownership and the industry's most comprehensive warranty. The FlexPay™ CRIND® card reader in dispenser is the leading global payment system. It's EMV

and Interac certified to meet Canadian payment security requirements, providing a hassle-free approach now and into the future. It's also compatible with all major Canadian POS systems for easy standardization across your network of sites. Encore S provides you with maximum flexibility to add options today and tomorrow. Your customers will find Encore S to be the most familiar and easy-to-use dispenser available, to build your brand and your bottom line.

Quality

- > Superior durability
- > Best-in-industry 2-year warranty with 4-year corrosion warranty on visible surfaces
- > Solid metal frame
- > Sheathing with automotive-quality coatings
- > High-quality PPU lenses protect against scratching and cracking
- > 5.7" colour screen
- > 3M quality speakers
- > High-speed 6" printer with superior graphics capabilities
- > Lowest cost of ownership
- > Easy installation
- > Roomy hydraulics cabinet
- > Superior usability with positive feedback grade selects, angled host outlet castings and ergonomic nozzle boots
- > Best distribution and service network in Canada

Security

- > Better physical fuel protection from a PIN-protected manager keypad, optional meter collar and a variety of cabinet locking options
- > Better payment security options, including a secure tribrid card reader, encrypting PIN pad, and full EMV and Interac certified CRINDs
- > Separate access and security for paper replacement only
- > More payment options, including RFID, contactless payment and barcode readers

Flexibility

- > Automatic Temperature Compensation option adjusts gasoline volume for 15° C
- > Flexible branding areas for customizable graphics
- > Choice of canopies
- > Colour capable screen
- > Dual price option
- > The industry's broadest range of models includes

Encore dispensers specifically designed for:

- Ultra-Hi flow at truck stops and travel centres
- Ethanol
- Biodiesel
- Liquid Propane Gas (LPG)
- Compressed Natural Gas (CNG)
- Diesel Exhaust Fluid (DEF)

Connectivity

- > CRIND is compatible with all major Canadian POS systems
- > Gilbarco's new Wisdom™ Intelligent Device Management system can keep an eye on your Encore S dispensers — and all your store systems — from anywhere
- > FlexPay CRIND is EMV and Interac certified as a freestanding Outdoor Payment Terminal, factory-installed in your Encore S dispenser, or as a field retrofit kit

Encore S Flexible Fuel Models

Alternative and renewable fuel users make up a fast-growing segment of your customer base. And Encore includes the industry's most comprehensive line of models specifically designed for these fuels. Internal components are optimized for use with alternative and renewable fuels, including biodiesel and E85. Models are available to provide up to five product selections from one fueling position — and you get all the features and options available on standard Encore units. Models for LPG and CNG are also available through our partners.

Diesel Exhaust Fluid (DEF) Model

Gilbarco Veeder-Root's Encore S DEF dispenser is the premium choice for North America's travel centres and truck stops. It's consistent with your brand image and familiar to your customers. It leverages your existing interfaces to CRIND payment and fleet card networks and loyalty programs that are supported by your existing point of sale system.

Yet, on the inside, it's designed specifically to prevent DEF freezing and crystallization with a heated cabinet and specially-designed optional hanging hardware. The Encore S DEF dispenser's hydraulics are stainless steel to protect against corrosion. And an innovative stainless steel mass flow meter measures DEF accurately and reliably.

Wisdom™ Intelligent Device Management (IDM) System

Monitor and control your Encore S dispensers, automatic tank gauge readings, coolers, air conditioning, store traffic, and more, at a glance from anywhere. Wisdom IDM is an integrated system that helps you manage your business and:

- > Increase uptime and efficiency
- > Enable energy management
- > Reduce operational costs
- > Avoid stock/product loss
- > Improve site security and control
- > Enhance customer loyalty and brand image
