

Passport® Point of Sale

Experience Retail
Made Extraordinary.

The Best Point of Sale (POS) Value for C-Stores.

Passport POS is the proven point of sale solution designed specifically for the c-store environment. It's helping c-store operators to succeed in more than 42,000 locations in the United States.

A world-class help desk that's always there (24x7x365) to minimize downtime

Remote troubleshooting expedites resolution

Integrates easily with fuel dispensers and 120+ partners that span loyalty, back office, signage, and security

The flexibility to grow your business with self-checkout and made-to-order food

A POS System That Works Like You Do

**Learn Passport
POS in 20
minutes or less.**

Your cashiers can get up to speed quickly thanks to the system's touchscreen and intuitive design. In some cases, employees can train themselves. And with customizable tips and prompts, even seasoned workers can serve customers better.

The all-touch interface also makes cashiers more efficient because there's no need to constantly switch between a keyboard and screen.

Seconds count for c-store customers.

We designed Passport POS to streamline the customer checkout experience and safeguard store operations.

Increase Staffing Flexibility and Improve Customer Satisfaction

- With a consistent user interface, employees can easily work across multiple store locations.
- Smart integration with your forecourt hardware quickly alerts employees to issues.

Continuous, **automatic backup** for easy recovery

- **Every 30 minutes** — Transaction data
- **Daily** — Differential backups
- **Weekly** — Full image with configurations

Local support is available to keep you up and running. Distributors have authorized service contractors (ASCs) who can be on-site if needed.

Stay secure and compliant

Sophisticated alerts and safeguards help employees perform at their best, protect customers' personal data, and secure your investment. Passport POS also includes:

- Easy-to-search electronic journal logs, cashier snapshot reports and a remote manager suite
- EMV-ready certification for all major payment networks
- Architecture that isolates payment activity in the Enhanced Dispenser Hub, leaving Passport POS free from PCI requirements
- Secure acceptance of most payment methods

Reliability with 99.993% uptime

Passport POS offers peace of mind with data backups that provide built-in redundancy to enhance security and uptime.

The combined workstation design includes primary and secondary drives which are backed up to a client. Data from the client is backed up to the server. An Enhanced Dispenser Hub also utilizes primary and secondary drives and backs up to the client.

So even when a device is offline in the c-store or out on the forecourt, functionality and your data are preserved. Cash and card payments can still be processed.

Expand your POS offering to expand efficiency and customer satisfaction

The Passport Retail Platform includes the following additional solutions that seamlessly work together:

- **Express Lane™ Self-Checkout** enables your customers to pay for fuel and c-store items without a cashier, including automated cash payments. Managers and cashiers are freed up to focus on customer satisfaction and loyalty.
- **Express Ordering™ Foodservice Solution** enhances the convenience of food prepared exactly as your customers want it. Customers can purchase fresh, made-to-order food at a dedicated self-service kiosk, cashier, drive-thru, or dispenser.

What you need to get started.

Passport Point of Sale is the foundation of the Passport Retail Platform from Invenco by GVR. It can grow to fit your current and future business needs, supporting additional cashier workstations, self-checkout and food ordering. Here's what you'll need to get started:
