1 – Introduction

Using this Manual

This manual is designed to aid Gilbarco's Authorized Service Contractor (ASC) or Customer Specified Contractor (CSC) in ordering replacement parts for the Cash Flow Network (CFN) Islander I or Islander II Systems.

⚠ WARNING

Electrical shock hazards exist in Gasboy CFN components. Gasboy systems are to be serviced only by properly trained personnel. During the warranty period, Gasboy systems must be serviced and repaired only by trained ASCs (see the Warranty for details or contact your Gasboy representative)/ CSCs. To reduce the risk of electrical shock when servicing, turn off and lock out all breakers which supply power to the CFN System (all components) at the master electrical panel.

The drawings and part lists on the following pages provide an easy reference for identifying CFN Islander parts and their corresponding part numbers. Multiple views of the system are provided to ensure that all parts are identified. Using the part numbers when ordering will expedite your order and reduce the possibility of wrong parts being shipped.

An asterisk (*) in front of a part number denotes that the part is a subpart of the preceding part without an asterisk. Consecutive part numbers with asterisks are all subparts of the first preceding part without an asterisk.

For example:

1 C05686 Filter Assy., RF Module

2 *C08330 Filter, RF Module #06AR2

3 *C08723 Fuse, 2 Amp - Quick Blow

In the example, parts 2 and 3 are subparts of part 1. If part 1 was ordered, parts 2 and 3 would be included. If needed, part 2 or 3 could be ordered separately.

Intended Users

The intended users of this manual are:

- ASCs
- CSCs
