### Streamlined

- Intuitive graphical user interface gets new cashiers up and running faster
- Smart forecourt integration alerts cashiers to forecourt issues
- All-touch interface including gesturing means no switching between keyboard and screen
- Intelligent display shows buttons only when needed
- See It/Touch It buttons eliminate codes

### Flexible Merchandising

- Two-level price posting, including different prices for debit and cash
- Multiple fuel discounting options, including payment type, loyalty-based and cumulative roll-back discounts
- Mix & Match and combo pricing with back-office control
- Unlimited active promos and PLUs per promo

### Smart, secure management tools

- Searchable electronic journal logs every cashier keystroke
- Cashier snapshot reports compare performance across cashiers
- Insite360™ Passport® enables web -based remote management

### Unbeatable product support

- Unbeatable site-wide expertise keeps your site running more smoothly
- Fault-tolerant Enhanced Dispenser Hub dispenses fuel and manages network transactions even after a server failure
- Redundant hard drives automatically back up system image and transaction data
- U.S.-based multilingual Help Desk support available 24/7/365

### Advanced system architecture

- Lasting PCI compliance from the industry leader
- Isolated PA-DSS runs independently from POS
- Small PCI footprint adapts to future PCI changes
- Secure printing of full network reports with all data included

### More third-party options

- Unmatched variety of third-party partners, including loyalty and marketing
- Modular architecture is more adaptable than proprietary systems
- Certified partner program for trouble-free integration
