

**INSTRUCTIONS FOR REPLACEMENT OF RESET COVER ASSEMBLY OR
REPLACEMENT OF RESET MOTOR AND SWITCH ASSEMBLY
MODEL 77 POWER RESET**

CAUTIONS:

1. Read *Important Warnings and Safeguards sheet, 035282* prior to working on unit.
2. Reset cover must be removed to a safe area, away from the dispenser island, if any soldering is required.

GENERAL NOTES:

1. For unlighted applications, cut off two yellow wires even with top of plug.
2. For 220V/50HZ motor, use black/white wires, and cap off the red wire.
3. For 240V/60HZ motor, use red/white wires, and cap off the black wire.
4. Some old resets contain an obsolete style plug and socket. If the plug on your new assembly does not mate with the socket on your reset, you must replace the entire assembly.
