

1500, 1600 and 1700 Series

Piston and diaphragm hand pumps.

Gasboy developed the Diaphragm Series 1720, Piston Series 1520, and Industrial Model 1520-T to meet your need for dependable, high-quality hand pumps that perform with every application. Compact, lightweight and economical, Gasboy hand pumps are simple to install and remove for fast changeover from one container to another. The short pump handle stroke minimizes operator fatigue and boosts production delivering up to 20 gallons for 100 strokes, fast, with minimal effort. They withstand daily use and provide all-weather operation. Every pump has a built-in strainer screen and vacuum breaker and is factory-tested for assured quality construction and performance!

Maximize your profits by contacting Gasboy or your local Gasboy distributor.

1500, 1600 and 1700 Series Specifications

1720

1720 Diaphragm Series

These popular high vacuum hand pumps are dependable, versatile performers, ideal for a variety of applications including 55 gallon drums, skid and truck tanks. They have an operating temperature of -25° to 165°F ; a self-adjusting bung adaptor with 360° radius positioning, and a 11 ft. lift with gasoline. Choose painted, UL listed Model 1720 or natural finish Model 1620.

1520 Piston Series

These models are equipped with TFE piston cups, accommodating a wide selection of industrial & chemical liquids. They have an operating temperature of -25° to 200°F ; a self-adjusting bung adaptor with 360° radius positioning, and a 11 ft. lift with gasoline (hose is not furnished). Available in two models: 1520 (painted, UL listed) & 1420 (natural finish).

Model 1520-T*

This industrial piston model hand pump is suitable for a wider range of industrial and chemical liquids*. It features one-piece valve assembly made of rugged, modern molded Teflon with stainless steel springs. Cover seals, inlet and outlet fitting seals, and shaft seals are chemically inert Teflon. Piston cups are Teflon compound. All internal parts are stainless steel or aluminum.

Our policy is one of constant improvement. Specifications subject to change without notice.

1520-T

WARNING

This product should not be used for pumping fuel or other liquids into aircraft. Pump not recommended where sanitary design is required (for food products for human consumption).

* Model 1520-T is not UL listed.
