

# Inform

Increase control over your sites and eliminate potential human error.

## Site Management Software

Inform™ is Veeder-Root's easy to use remote communications software that lets you get the most out of your tank monitoring systems. The product is designed to automate your data collection and couple this data with a flexible report generation.

Inform gives you more control over your sites, by providing centralized and accurate inventory, leak detection and diagnostic information. Inform also improves the efficiency of data collection from your sites, allowing you to more accurately monitor your inventory and risk management issues, while at the same time eliminating possible human errors.

## Program features and capabilities

Inform uses an open database format Microsoft® Access, allowing easy export to other popular software packages such as Microsoft® PowerPoint or Microsoft® Excel for further data manipulation.

Inform is intuitively easy to use, requiring very little training. Whether it is site setup,

Now With  
Quick  
Connect!

data collection setup, report generation or site diagnosis, all are only a couple of mouse clicks away.

Once your sites are setup, the main screen will give you an "At a glance" site status. The color coding indicates the condition at the site. Want to troubleshoot a site? Just double click the station name and you will be automatically connected to that site. In the unlikely event you do run into a problem, there is on-line help. The on-line help is context sensitive, assistance on the subject you most likely want.

By accurately controlling your risk management and inventory issues, and increasing your profitability, Inform lets you get more mileage out of your tanks.

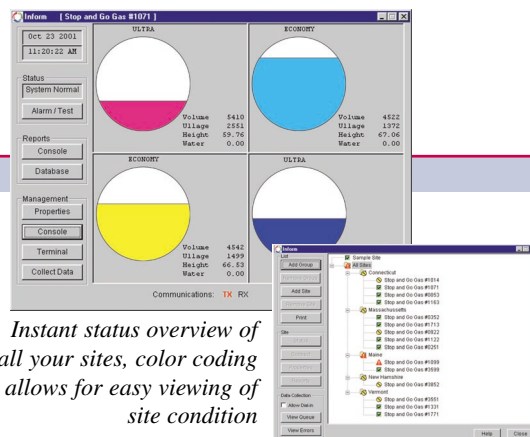

Equipped with a V-R Ethernet module or V-R Sitefax modem the TLS Console can "call home" to Inform, alerting you of a problem. Communicate with your tank gauges over standard dialup lines or over a wide area network (WAN) using the Internet Protocol (IP). Communicate critical site information to key people, via pager, PDA or cell phone. Inform allows you to setup email groups to receive vital management information down to the individual alarm.

anytime... anywhere... any gauge...

# Increase profits and get more mileage out of your tanks.

*Instant status overview of all your sites, color coding allows for easy viewing of site condition*

## Inform can communicate with the following tank gauges

- Veeder-Root TLS-350, 300 Series, TLS-250 and TLS-2 Consoles
- EMC Series Consoles
- Legacy Red Jacket Series Consoles
- Red Jacket Prolink, ST and RLM Consoles
- INCON TS Series Consoles
- EBW Consoles
- Any ATG that supports TLS-250 commands

Veeder-Root TLS-350 and 300 Series Consoles

## Improved control over fuel status at sites

- "At a glance" overview of site status
- Reduced risk of run-outs/haulbacks
- Increased profits with daily efficient distribution scheduling
- Real time warning capability on TLS-350s equipped with SiteFax modem or Ethernet card.
- Custom programming via RS-232 serial interface commands

## Improved efficiency of data collection

- Site personnel can focus on core competencies

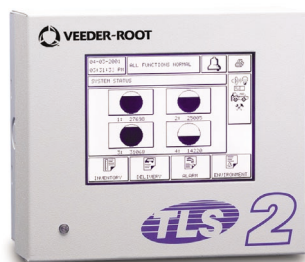

## On line diagnostic capability

- Troubleshoot your site before dispatching maintenance crews
- Quick connect
- Reduces polling/connection time by accessing only the information you need in the ATG

Legacy Red Jacket Series Consoles

Veeder-Root TLS-2 Series Consoles

## Inform minimum requirements

- Microsoft ® Windows: XP, 2000, NT, 98, 95
- Internet Explorer 5.0
- Pentium II processor 400 mhz
- 50mb available hard drive capacity
- 256 mb Ram
- Modem/Network Connection

## Data retrieval

Inform can communicate vital site information to your staff via E-mail.

## Order Information

Pin	License
848940-010	Single site
848940-005	1-5 sites
848940-006	1-20 sites
848940-007	1-100 sites
848940-008	Greater than 100 sites
848940-009	30 days, 5 site trial
