

# Model 2020 Hand Pump

Big Value in a Low Cost Pump

Here is a versatile and rugged little pump you can use everywhere to dispense a wide range of liquids.

The capability and truly low price of the Model 2020 make it practical to put at least one on the shelf to be ready for use with whatever liquid is delivered next in drum or plastic container.

Listed below are just a few of the hundreds of liquids the Model 2020 is approved to handle: +

- lube oils
  - additives
  - anti-freeze
  - gear oils
  - paraffin
  - inks
  - light machine oils
  - cutting oils
  - additive oils
  - cutting fluids and emulsions
  - hydraulic oil
  - automatic transmission fluid
  - light engine oils up to SAE 50
  - solvents<sup>+</sup>
  - insecticides<sup>+</sup>
- and dozens more!

Thousands of uses--on barrels and drums in:

- factories
- machine shops
- maintenance and repair shops
- garages
- laboratories
- contractors' yards
- farms
- graphic arts and printing plants
- marinas

For satisfactory handling, liquids should have viscosity at least as low as light engine oil at room temperature.

<sup>+</sup> Please check with Gasboy Pump Service Department for compatibility of solvents, insecticides, and fluids not listed, with pump materials.
