

Worldwide leader in solutions for
fleet and commercial markets

Gasboy® is the name to trust for all your fleet management and commercial equipment needs. It's the one brand that offers you complete systems with all the features and options you need now and in the future.

All our equipment is designed and tested to work together seamlessly. And our systems are supported by the industry's most comprehensive network of authorized service providers.

You'll enjoy the peace of mind, simplicity, durability, security and efficiency your Gasboy® system brings.

The Gasboy[®] Solution

- Enjoy peace of mind by choosing the market leader
- Simplify your life with a single point of contact for your entire site
- Grow with confidence and build on your technology investments
- Maximize efficiency and uptime with durable systems
- Manage resources effectively and securely from anywhere

Enjoy peace of mind and simplify your life

For more than 80 years, Gasboy® equipment has been helping fleet and commercial operators like you to succeed. That's why today Gasboy is the brand most often specified. And, with the industry's largest installed base of fleet equipment around the world, it's the brand most often chosen.

When you construct a complete solution from components that are designed to work together, you get the best possible value. Maximum uptime and quality information give you the advantage.

Integrated design, coordinated development and intense testing make strong interfaces that provide rich data. You make decisions based on complete information and detailed reports. And a single supplier and service provider is fully responsible for system performance end-to-end. No finger-pointing. No excuses.

When you choose Gasboy, you are choosing the industry's:

- Market leader worldwide
- Largest, most comprehensive network of distributors and authorized service contractors
- Most durable equipment

Turn to Gasboy for seamless interoperability of:

- Fuel dispensers
- Site controllers
- Management report software
- Vehicle tags
- Card/key systems

Our sister brands, Veeder-Root® and Red Jacket® also add underground fuel monitoring and submersible turbine pumps to the mix. They are often sold and supported by the same distributors and service providers as Gasboy equipment.

Grow with confidence

Small, simple operations today can become larger and more sophisticated tomorrow.

When you choose Gasboy® equipment, you start with the industry's most comprehensive selection of equipment for fleet and commercial operators of all sizes.

As your needs change, the interoperability of the Gasboy platform means we'll have just the right equipment to complement your changing needs and build on your existing investments.

Gasboy offers the industry's most comprehensive lines of:

- Consumer, transfer and above-ground storage tank (AST) pumps for basic fueling
- Mechanical and electronic pumps and dispensers for fleet and commercial operations
- Island readers with card and key systems to control access and identify drivers
- Fleet management systems and site controllers
- Vehicle RFID systems to identify vehicles and track mileage accurately
- Management report software to improve decision-making from anywhere

Maximize efficiency and effectiveness

Rugged systems stand the test of time, providing reliable service even in the most challenging environments and in unattended applications. Maximum uptime provides smooth operation and optimal efficiency.

A variety of technology choices, including keys, cards, and RFID, empower operators to identify and track vehicles, fuel and drivers.

Management systems can control access, apply reasonableness checks, and track mileage for proactive vehicle maintenance.

Report software enables the operator to analyze current data from anywhere for sound decisions.

Gasboy technology fits your application

- Lighted systems help to secure unattended sites
- Durable equipment withstands the elements and rough handling
- Wireless systems transmit data to minimize conduit and wiring
- Site controllers are designed for use in the environment
- Customizable reports are easy to configure
- Managers can access reports from the office, home or on the road
- Fleets can create their own cards, add or remove drivers
- Operations managers schedule proactive vehicle maintenance based on accurate mileage information

Complete solution provider
