

Profit Point PLUS

Modular POS Workstation

Easy-to-learn. Easy-to-use. Gasboy Profit Point PLUS is a fully integrated POS workstation designed for quick, accurate customer service. The versatile Profit Point PLUS handles pump control, electronic cash register, and card processing functions with interfaces to in-pump and stand-alone island card readers.

The PC-based Profit Point PLUS is a peripheral to the CFN system. The 15-inch LCD monitor provides a graphical user interface to help guide you through transactions. This graphic display, along with a training mode, enables new personnel to learn quickly. It also provides an easy-to-read, detailed view of all transactions and/or individual transactions, eliminating the multiple steps of traditional displays. Pop-up menus guide you through transactions while user-friendly icons show the status of pumps and sales. Fuel, merchandise, and combination sales are handled efficiently. With Profit Point PLUS, your customers can use a variety of payment methods and change due is automatically calculated, then graphically displayed on the monitor.

The Profit Point PLUS has a 30,000-item price book and a scanning option. Modular components allow for a flexible configuration.

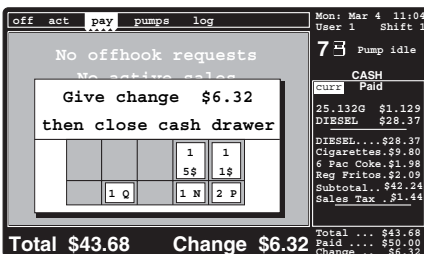

For more information, contact your local Gasboy distributor.

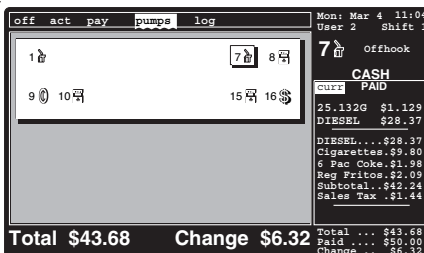

Profit Point PLUS Standards and Specifications

Hardware

- Keyboard - 112 keys, fully programmable, full travel
- Keys - Relegendable single and doublewide keys available.

Graphics simplify operation, even displaying change due.

View status of all pumps in a single glance.

POS

- Standalone mode - operates in case of site controller failure; sales can be updated to site controller's journal when system comes back on line.
- Training mode - duplicates exact site setup, simulates new pump and card reader sales. Sales are not updated to journals, so reports are not affected. Runs without site controller for use at home office or training center.
- Communication ports - 2 serial, 1 parallel.
- Security - sign on 99 users, 10 permission levels.
- Sale stacking - two for merchandise and each fueling position (66 total).
- Fire and forget feature - allows one sale to go for authorization while handling another customer.
- Food stamp restriction.
- Pre- or postpay operation.
- Pump status menu.
- All stop.
- Cash count - enter number of bills and coins in drawer and system extends totals. Prints receipt.
- Park transactions - suspends transactions, then resumes at a later time after handling other transactions.
- Safe drops - automatic, with prompting
- Modifier keys - save on duplicate keys by use of small, medium, large and extra large keys.
- Age ID - two age ID checks available for tobacco and alcohol.
- Transaction items - shown in receipt style display.
- Pump control - 32 fueling positions.

Price Book

- 30,000 PLU's
- Grouping - list multiple items or departments on a single key.
- UPC, stock or department entries
- Vendor number
- 16-character description
- Cost plus markup
- Price override restrictions
- Global edit, search and replace
- Output/input to/from ASCII file
- File for new or missing UPC
- Discounts - percentage or dollar amount

Optional Hardware

- Receipt printer - impact, dot matrix, 40-column, may be shared between workstations

Note: Reference the CFN System Brochure and other CFN product sheets for information on system functionality, networks, reports, etc.

WARNING

Failure to follow these instructions may result in property damage, personal injury or loss of life. Gasboy products must be installed by a qualified installer and used in conformance with all building, fire and environmental codes and other safety requirements applicable to their installation and use, including, but not limited to, NFPA 30, NFPA 30A and NFPA 70. This product is only part of a fuel dispensing system and additional equipment and accessories, such as, but not limited to, breakaway connectors, shear valves, pressure regulators and other safety devices may be necessary to meet the applicable codes. Qualified installers shall be familiar with fuel system installations under the above stated building, fire and environmental codes and other safety requirements required for the particular type of installation. Gasboy dispensers shall not be used for the direct fueling of aircraft without filters, separators and other equipment necessary to ensure product purity. All sales subject to Gasboy standard warranty.
