Gasboy® CFN III Version 3.6 Is Now PA-DSS Compliant

Gasboy's CFN III software version 3.6 has successfully passed the PCI Security Standards Council. The PCI Security Standards Council will list the Application on its Validated Payment Application List shortly.

Now that we have received our approval, the ship hold has been lifted and we are beginning to ship the backlog of orders that we currently have in-house. In addition, we are also able to start accepting new 3.6 orders. The pricing below is now in effect for processing 3.6 upgrade and new system orders.

- All customers that do not have a current annual software support agreement in place will pay \$1,288 to upgrade to V3.6 software.
- All customers that do have a current annual software support agreement in place will pay \$644 to upgrade to V3.6 software.

Please also complete the form on the next page and submit it with your upgrade orders.

We appreciate your understanding during this approval process with PCI. Gasboy is committed to a proactive, long-term partnership that prevents data compromises and breaches.

Sincerely,

Kevin DeVinney
Gasboy Marketing Director

CFN PCI Software Upgrade V3.6
