Proven Protection

Proven Profit

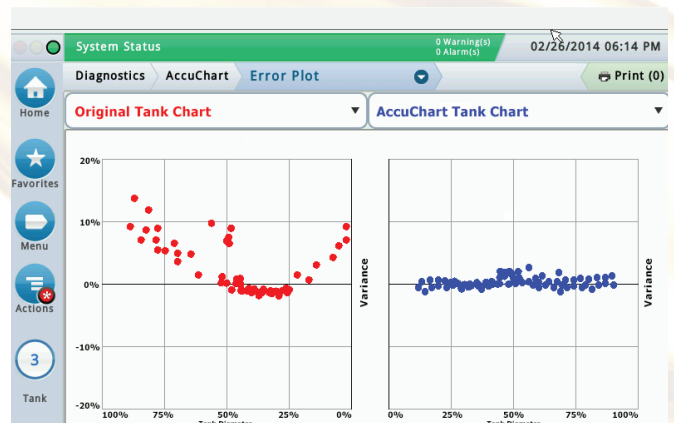

Proven Partner

Proven Precision

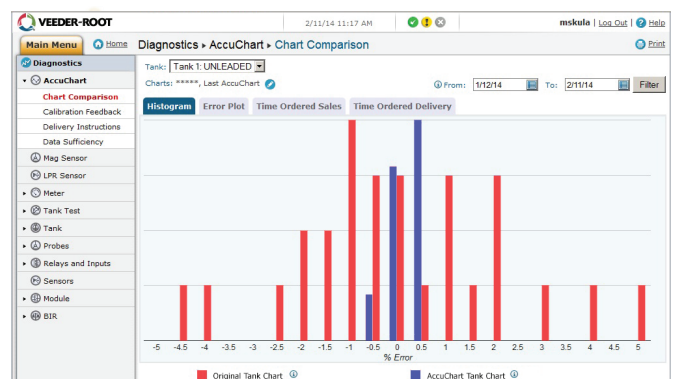

The **TLS4** automatic tank gauge is the premier wet stock management solution. It delivers accurate, crucial information, including:

- **AccuChart** – advanced technology that provides best-in-class tank chart calibration, delivering the most precise picture of your inventory all day, every day. AccuChart reconciles tank tilt, dents and out-of-round tank conditions.
- **Business Inventory Reconciliation (BIR)** – an accurate tank chart combined with BIR provides awareness into your site variance to improve business decisions.
- **Continuous Statistical Leak Detection (CSLD)** – robust 0.2gph (0.8lph) monthly tank leak detection that avoids site shut down to run compliance tests.
- **Static Leak Detection (SLD)** – 0.1gph (0.4lph)
- **Data Logger** – the built-in data logging capability in the **TLS4** enables advanced wet stock management and enhances feature performance by providing improved data transfer capabilities.
- **Temperature Compensated Volume** – sophisticated algorithms compensate for the impact of temperature on product volume delivering a precise inventory picture.

TLS4 Web-Enabled Pictorial Offers Instant Access of Variance Improvement Delivered by AccuChart

Proven Protection

The Veeder-Root **TLS4** monitoring system uses sensors, probes and advanced software solutions to deliver accurate wet stock and forecourt information. The **TLS4** protects your fuel assets whether you are on-site or with your family.

- **Web-Enabled Remote Connectivity** – the **TLS4** offers anytime, anywhere access via web-enabled devices to monitor site performance, providing peace-of-mind by delivering real-time alerts, compliance reports and variance analysis.

- **Switch Networks** – two built-in Ethernet switch networks protects point-of-sale data from the public internet domain.
- **Data Protection** – up to 3 years data storage that is protected in the event of a power outage, battery replacement or software upgrade.
- **Reduced Risks** – the **TLS4** eliminates manual tank dipping by reducing exposure to harmful fumes and by minimizing forecourt access.
- **Customized User Access** – A user-configurable login enables deployment of company specific security controls and procedures.
- **Advanced Sensor Technology** – compatible with existing Veeder-Root sensors and probes.

Proven Profit

The compact and powerful **TLS4** monitoring system is expandable and extremely easy to use. View, configure, and control the **TLS4** using the GUI, or at multiple locations using web-enabled, to improve efficiency and save money. High-end features include:

- **Color Touch Screen** – easy, clear navigation quickly points to crucial information.
- **Faster Problem Resolution** – remote troubleshooting and diagnosis prevents unnecessary dispatch and more efficient service calls.
- **Customized Home Screen and Favorites** – ease of use saves operator response time.
- **Customized Alarms** – preprogrammed alarm alerts provide scenario-specific information to predetermined individuals to increase efficiency.

- **Customer Satisfaction** – the **TLS4** eliminates manual dipping so station managers have more time to work with customers.
- **Future Proof** – purchase the **TLS4** today and enjoy the option to add additional features later as your business grows or as regulations change.

Proven Partner

Founded nearly a century ago, Veeder-Root is the global leader of automatic tank gauges, backed by an unmatched service network. Around the globe, more than half a million petroleum marketers and commercial fueling businesses enjoy increased profits and protection of their fuel assets with Veeder-Root's solutions.

Our proven company history, combined with the highest precision levels in our wet stock management tools, delivers results that matter and the protection your business deserves.
