

End of Life Notification

Mag-XL Transmitter & Battery

Overview

Veeder-Root is announcing the global End of Life for the Mag-XL transmitter and battery used for system expansions and replacements on existing Mag-XL Tall Tank Monitoring Systems.

The legacy Mag-XL Tall Tank Probes have been obsoleted since 2016 and it is no longer feasible to support component parts for these products.

If system expansion or component parts are needed for existing Mag-XL Tall Tank installations, the system will need to be replaced with the current Mag-FLEX Tall Tank Probe offering. Refer to the TLS Price Books or the Product Update Notification - Mag-FLEX Tall Tank Probe - Extended Sizes & Additional Temperature Sensors (576047-432) for more information on the Mag-FLEX Tall Tank solution.

▶ End of Life Timeline

Due to limited availability of the component parts, Veeder-Root will support orders through **September 30, 2022**, or while supplies last. Please contact Customer Service at neworders@veeder.com.

▶ Impacted Equipment

Part Number	Description
0330020-673	TLS-RF Wireless 2 Transmitter (for use with Mag-XL AST Probes)
0858090-202	Mag-XL Wireless 2 Battery Powered Transmitter (3-pin, one per Mag-XL AST Probe)
