

Marketing Sales Release **Software Release Version 9E** **TLS-450PLUS and TLS4 Series Consoles**

1.0 Purpose

This Marketing Sales Release (MSR) announces the release of version 9E software for TLS450PLUS and TLS4 Series consoles.

2.0 Description and Overview

The Veeder-Root strategy is to provide software releases on a regular cadence to furnish additional functionality, inclusion of customer requests, security updates and other enhancements in a timely manner. The following information outlines the modifications in this release.

3.0 Features and bug fixes

- a. SLD Threshold update for CEN*
 - i. The SLD threshold was updated to accommodate the CEN regulation requirements.
- b. Minor bug fixes*
 - i. Minor bug fixes to improve speed, performance, and platform stability.

4.0 Release Schedule

Veeder-Root recommends TLS450PLUS and TLS4 Series customers keep their console software upgraded to the latest version.

The TLS-450PLUS and TLS4 Series software upgrades can be downloaded directly from the veeder.com site by following this link:

<https://www.veeder.com/us/automatic-tank-gauge-software-download>

Software upgrades can also be ordered on a USB Flash drive at no charge for a limited time by ordering the software kit part number 330020-744

As a best practice when upgrading software, Veeder-Root recommends verifying that the Universal Sensor Module (USM) and Input/Output Module (IOM) are operating with the latest firmware version. Instructions for a USM or IOM firmware update can be found in *Continuing Education Bulletin 2015-08B, Firmware Upgrade*.

5.0 Documentation
