

Marketing Sales Release

Software Release Version 9F

TLS-450PLUS and TLS4 Series Consoles

1.0 Purpose

This Marketing Sales Release (MSR) announces the release of version and 9F software for TLS450PLUS and TLS4 Series consoles.

2.0 Description and Overview

The Veeder-Root strategy is to provide software releases on a regular cadence to furnish additional functionality, inclusion of customer requests, security updates and other enhancements in a timely manner. The following information outlines the modifications in this release.

3.0 Features and bug fixes

a. Minor bug fixes and performance enhancements

- i. Minor bug fixes to improve speed, performance, and platform stability.

4.0 Release Schedule

Veeder-Root recommends TLS450PLUS and TLS4 Series customers keep their console software upgraded to the latest version.

The TLS-450PLUS and TLS4 Series software upgrades can be downloaded directly from the veeder.com site by following this link:

<https://www.veeder.com/us/automatic-tank-gauge-software-download>

Software upgrades can also be ordered on a USB Flash drive at no charge for a limited time by ordering the software kit part number 330020-744

As a best practice when upgrading software, Veeder-Root recommends verifying that the Universal Sensor Module (USM) and Input/Output Module (IOM) are operating with the latest firmware version. Instructions for a USM or IOM firmware update can be found in *Continuing Education Bulletin 2015-08B, Firmware Upgrade*.

5.0 Documentation

Manual information can be obtained from our technical document library by following this link:
