# Instructions for Retrieving Data for TLS-350 to TLS-450PLUS ATG Upgrade
Easily retrieve console configurations to upgrade to the TLS-450PLUS Automatic Tank Gauge (ATG) by following all five steps sequentially.

Screens referenced below may vary slightly depending on your ATG.

1 **System Information (Software & Features)**
- Start at the **main screen**:

  MMM DD, YYY HH:MM:SS XM
  ALL FUNCTIONS NORMAL

- Press **MODE** twice:

  DIAG MODE
  PRESS<FUNCTION>TO CONT

- Press **FUNCTION** once:

  SYSTEM DIAGNOSTIC
  PRESS<STEP>TO CONT

- Press **PRINT**

2 **System Configuration (Modules)**
- Press **STEP** four times until you are at the **System Configuration screen**:

  SYSTEM CONFIGURATION
  PRESS<ENTER>

- Press **PRINT**
- Press **STEP** four times until you are at the **DIM Diagnostic Data screen**:

  DIM DIAGNOSTIC DATA
  PRESS<ENTER>

- Press **PRINT**

3 **In-Tank Diagnostic (Probes)**
- From the DIM Diagnostic Data screen, press **FUNCTION** twice until you are at the **In-Tank Diagnostic screen**:

  IN-TANK DIAGNOSTIC
 PRESS<STEP>TO CONTINUE

- Press **PRINT**

4 **General Setup (Sensors, Line Leak, and DIMs)**
- Press **MODE** once until you see the **Setup Mode screen**:

  SETUP MODE
  PRESS<FUNCTION>TO CONT

- Press **PRINT**

5 **Final Steps**
- Collect your printouts and send them to your distributor to build your **TLS-450PLUS Bill of Materials**.
