VEEDER-ROOT

End of Life Notification
HydrX™ Fuel Conditioning Controller

Overview

HydrX Fuel Conditioning Controller
Veeder-Root is committed to providing the highest quality products and services to our customers. As the world leader in fueling systems technology, we view product End of Life (EOL) as part of the natural cycle that drives technology evolution. Therefore, we are communicating the end of life our the HydrX Fuel Conditioning Controller (FCC) **effective immediately**.

The functionality of this product was integrated into the TLS-450PLUS ATG and TLS4 ATG with a TLS-XB Expansion Box * with the release of TLS software version 10.F. Managing the HydrX system directly through the tank gauge delivers a superior user experience and allows the customer to integrate HydrX into their established workflow. HydrX systems controlled through the ATG now have remote access to system configuration and status. Additionally, independent notifications are available to inform users of required actions that may be needed.

▶ Targeted Market

North America Only

* *TLS4B is not compatible with HydrX*

▶ Transition Details

For customers using a FCC, we recommend upgrading to software version 10.F or higher (TLS-450PLUS and TLS4 Series Consoles Configurable Software Download Form) and following the steps outlined in the HydrX Fuel Conditioning System - FCC to ATG Conversion Guide (577014-490).

In most cases no new hardware is required. Check to make sure you have the necessary I/O before performing the upgrade.

For customers who have any uninstalled FCCs, proceed with the ATG Controlled HydrX installation steps outlined in HydrX Fuel Conditioning System Installation Manual (577014-446).

Please contact Customer Service at customerservice@veeder.com for orders, if new modules are required.

▶ Schedule for Fuel Conditioning Controller

| End of Life Product Details

HydrX Component	Fuel Conditioning Controller	0860400-001	Software	TLS-450PLUS & TLS4 Console Software	10.F or higher

If your customer has this...

They should upgrade to this...

Note: The overall HydrX system pricing remains the same. When the FCC was required at a cost of $829.00, the software enhancement feature was offered at no charge. Now that the FCC is no longer required the cost is applied to the software enhancement feature. Please refer to the Product Update – HydrX Fuel Conditioning System (576047-481) emailed on March 9, 2023, for the latest system part numbers and pricing.
