

Software Release Updates

TLS-4xx Series Consoles & IQ2 Smart Controller

Version 11.B software for the **TLS-450PLUS** and **TLS4 series consoles is now available**. Version 11.B includes important updates to support **Veeder-Root Device Management** and helps enhance internet security on the console.

Also available for download is **Firmware 4.03** for the **Red Jacket® IQ2 Smart Controller**. This includes important updates and enhances **Intelligent Pump Control (IPC)** compatibility.

► Performance Enhancements

Veeder-Root Device Management

- Veeder-Root Device Management delivers a centralized overview of your ATG network, including inventory management, alarm monitoring, advanced diagnostics, predictive maintenance, remote upgrades, and actionable insights. Real-time data helps streamline maintenance workflows and maximize site uptime to ensure continuous fuel supply.
- Upgrading to the latest 11.B software allows site owners to access the newest features, technology enhancements, and IQ2 compatibility.

Red Jacket IQ2 Smart Controller

- **Software 11.B** and **IQ2 Firmware 4.03** are currently the **minimum versions required** to integrate the Red Jacket IQ2 Smart Controller with the TLS-450PLUS. Firmware 4.03 is **not backwards compatible** with previous software versions.
- Install IPC to enable remote management of your STP network:
 - Monitor and control a network of up to 31 IQ2 Smart Controllers
 - Power consumption insights for each STP connected to the IQ2 network

Ongoing Improvements

- New Scheduled Pump Run feature enables users to set STP activation at predefined times, avoiding alarms during extended idle periods
- Miscellaneous bug fixes and updates
- Important security updates
