

2026 | RETAIL TECHNOLOGY CONFERENCE

Meet DOMS:

The Worldwide Forecourt Automation
Platform of Choice

Why Everyone Uses a Forecourt Controller

Control energy delivery

Centralized communication and control between the POS and any dispenser across any energy types

Manage errors and discrepancies in sales details and reporting

Track fuel transactions in real-time, incl. volume dispensed, price and payment details; sends transaction data to POS and integrate with systems off-site

Stockout, timely fuel replenishment

Interfaces with ATGs to monitor fuel and water levels, facilitate reconciliation, inventory monitoring and delivery planning

Risk of accidents and environmental hazard

Monitors pump status and safety sensors to detect faults, leaks or emergency shutdowns; initiate emergency stop commands

Maintain detailed logs and reports for compliance

Facilitate integration between fuel dispensers and POS/BOS retail systems for seamless operation

Meet DOMS

- Founded in 1958, dedicated to the oil industry
- First Forecourt Controller launched 1981, evolved to 7th generation of Hardware and Software
- Part of the Gilbarco Veeder-Root family Since 2004

DOMS has an unparalleled reputation as an industry leader, with 120K+ installations across 100 countries.

Meter Service

DOMS: The Operational Backbone of Your Site

What it Does

Mission-critical forecourt automation platform for on-site and cloud deployment

A single interface to control all traditional devices - dispensers, tanks, OPTs, POS, payments, EV - and any IoT device, with support for 100+ protocols

Maximum reliability: 99.999% uptime per year and a 0.2% failure rate (2000 PPM)

Device-agnostic and flexible, adapting to your business processes and needs.

Runs on our hardware with SBC and third-party software support

Why it Matters

Grow revenue opportunities

Improve operational efficiency

Future-proof your operations

A Rich Set of Automation Services for Convenience Retail

Major Global Down Stream Customers and POS partners

Major Global Down Stream Customers

Major POS Partners

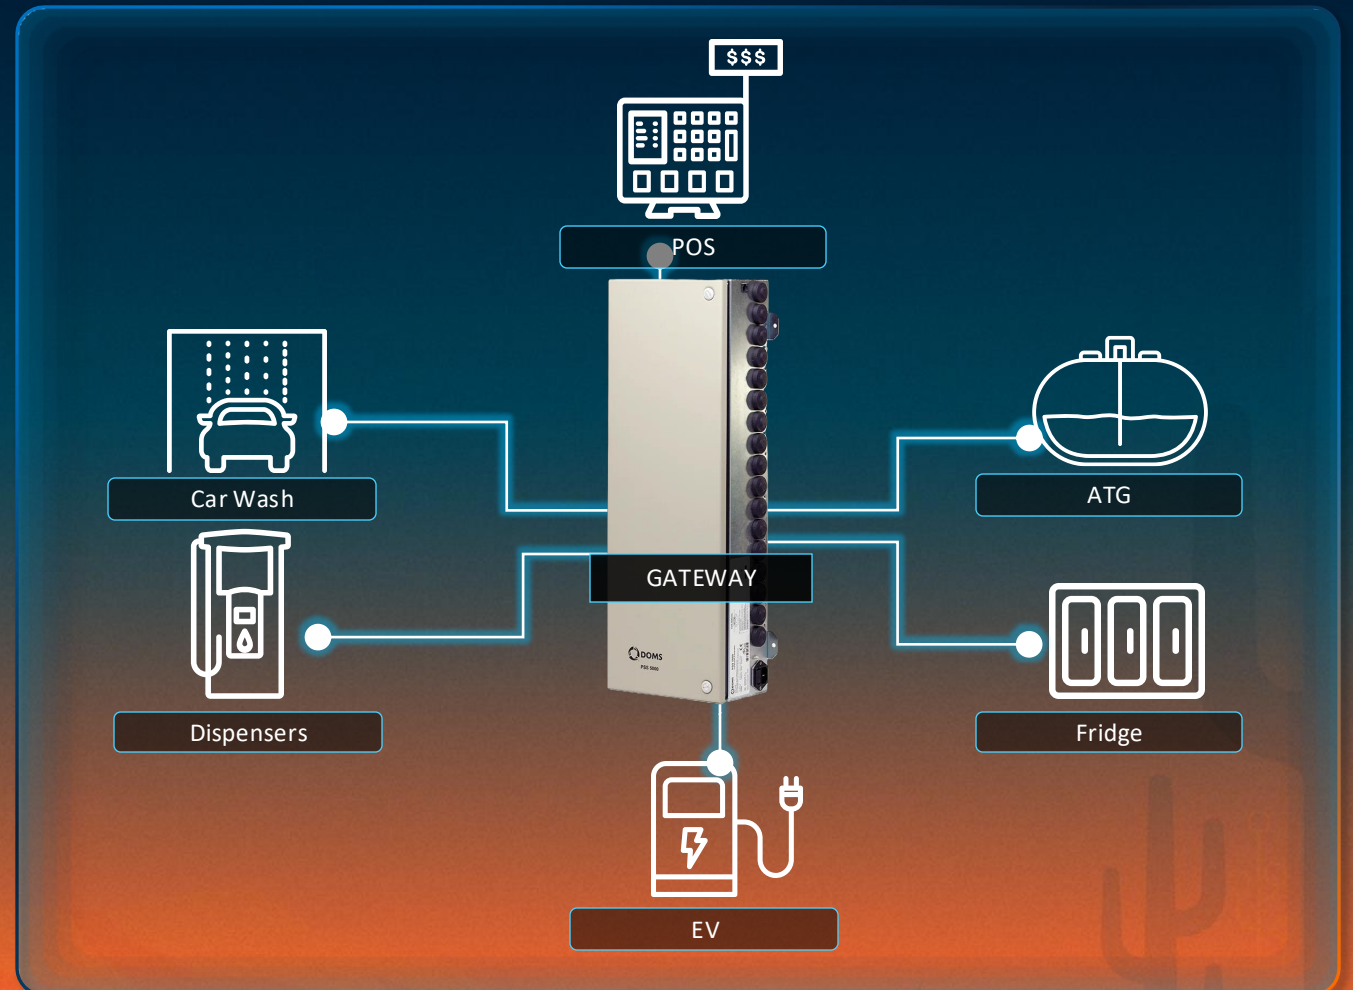

Your Trusted Partner Across All Retailers & Vendors

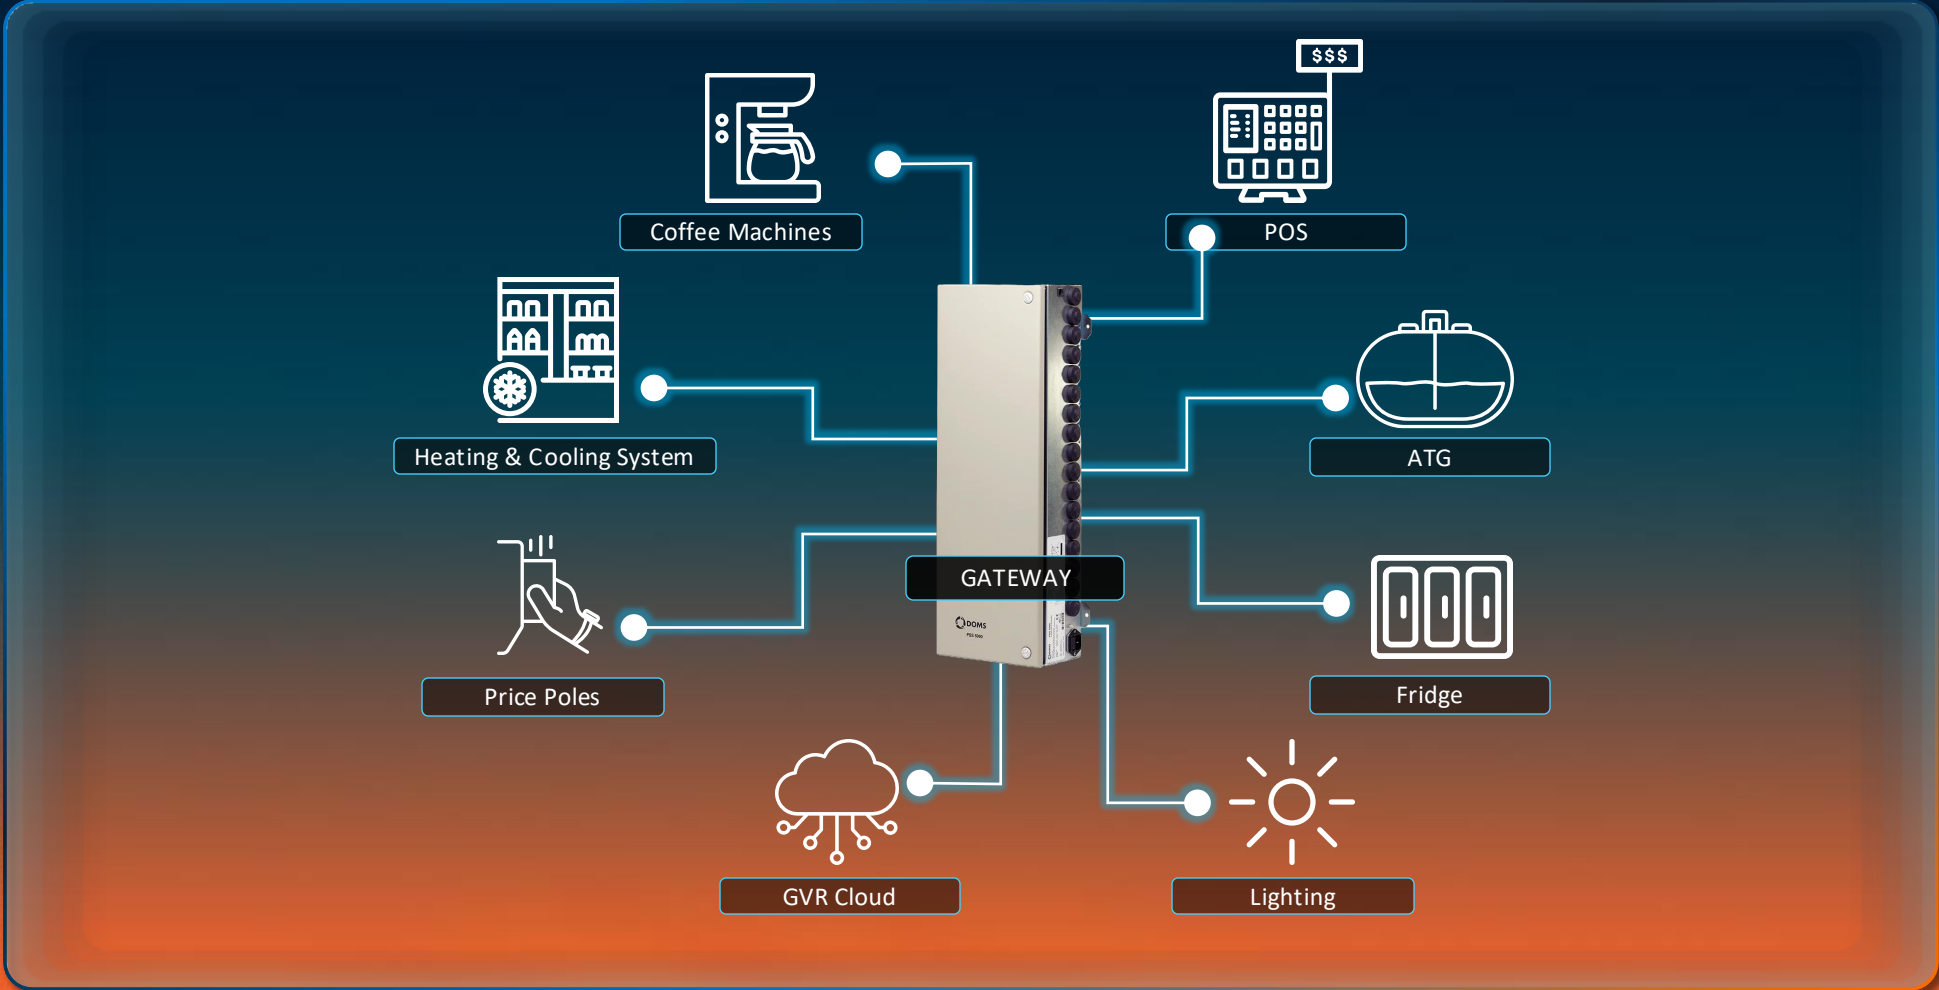

Manage Your Entire Operations Through

Connect to all your devices through a single interface and manage your entire operation from a single platform through our Hub:

- Remote software upgrade
- Smart troubleshooting across devices
- Incident management
- Remote configuration

Deployment Options

TRADITIONAL

On premise, Simple to deploy

VIRTUALIZED

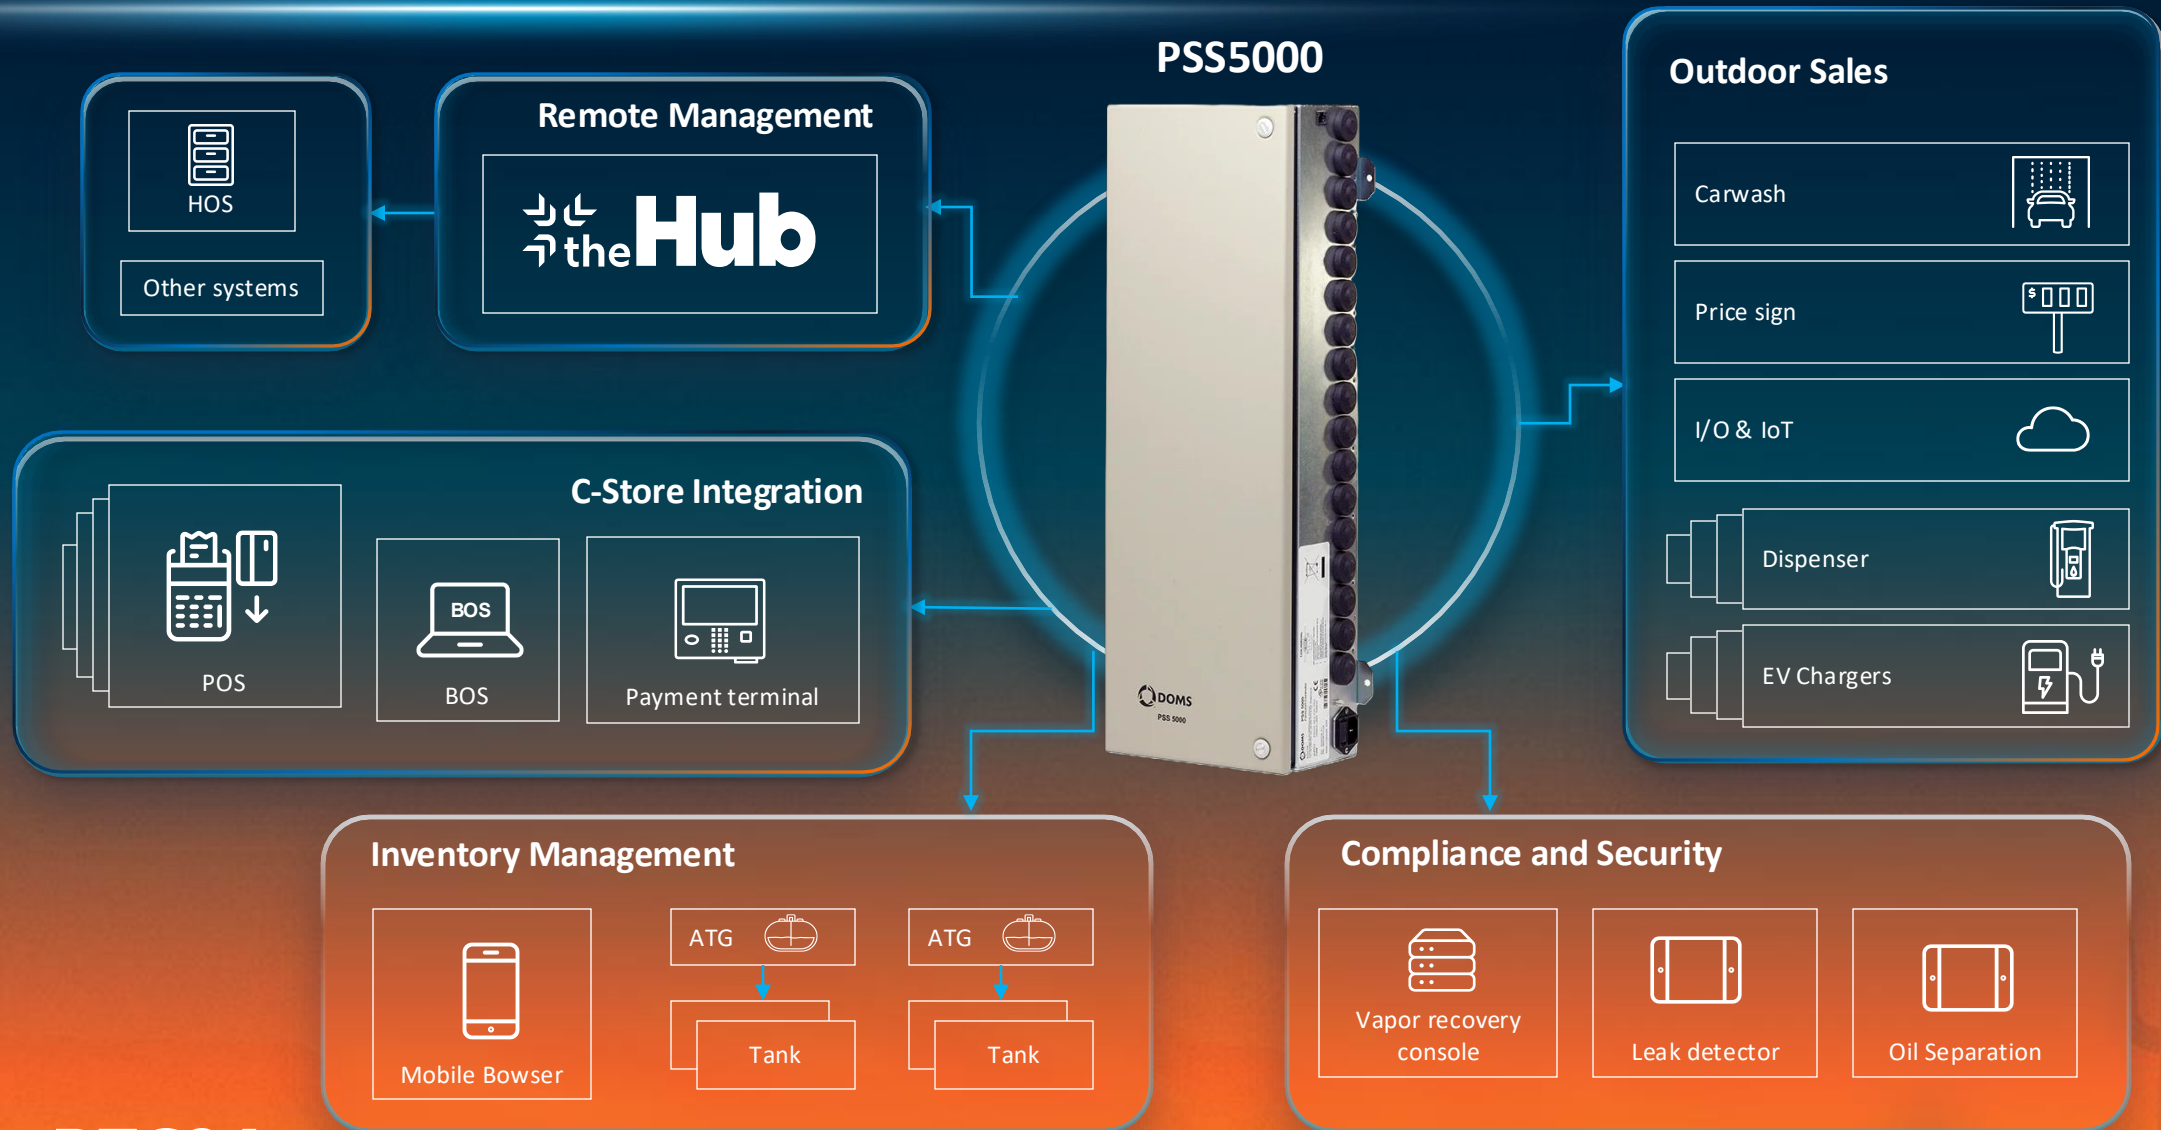

Better uptime, fits into your overall cloud strategy

DISTRIBUTED

Maximum uptime, build in redundancy

Traditional Deployment

Virtual Deployment

Available:

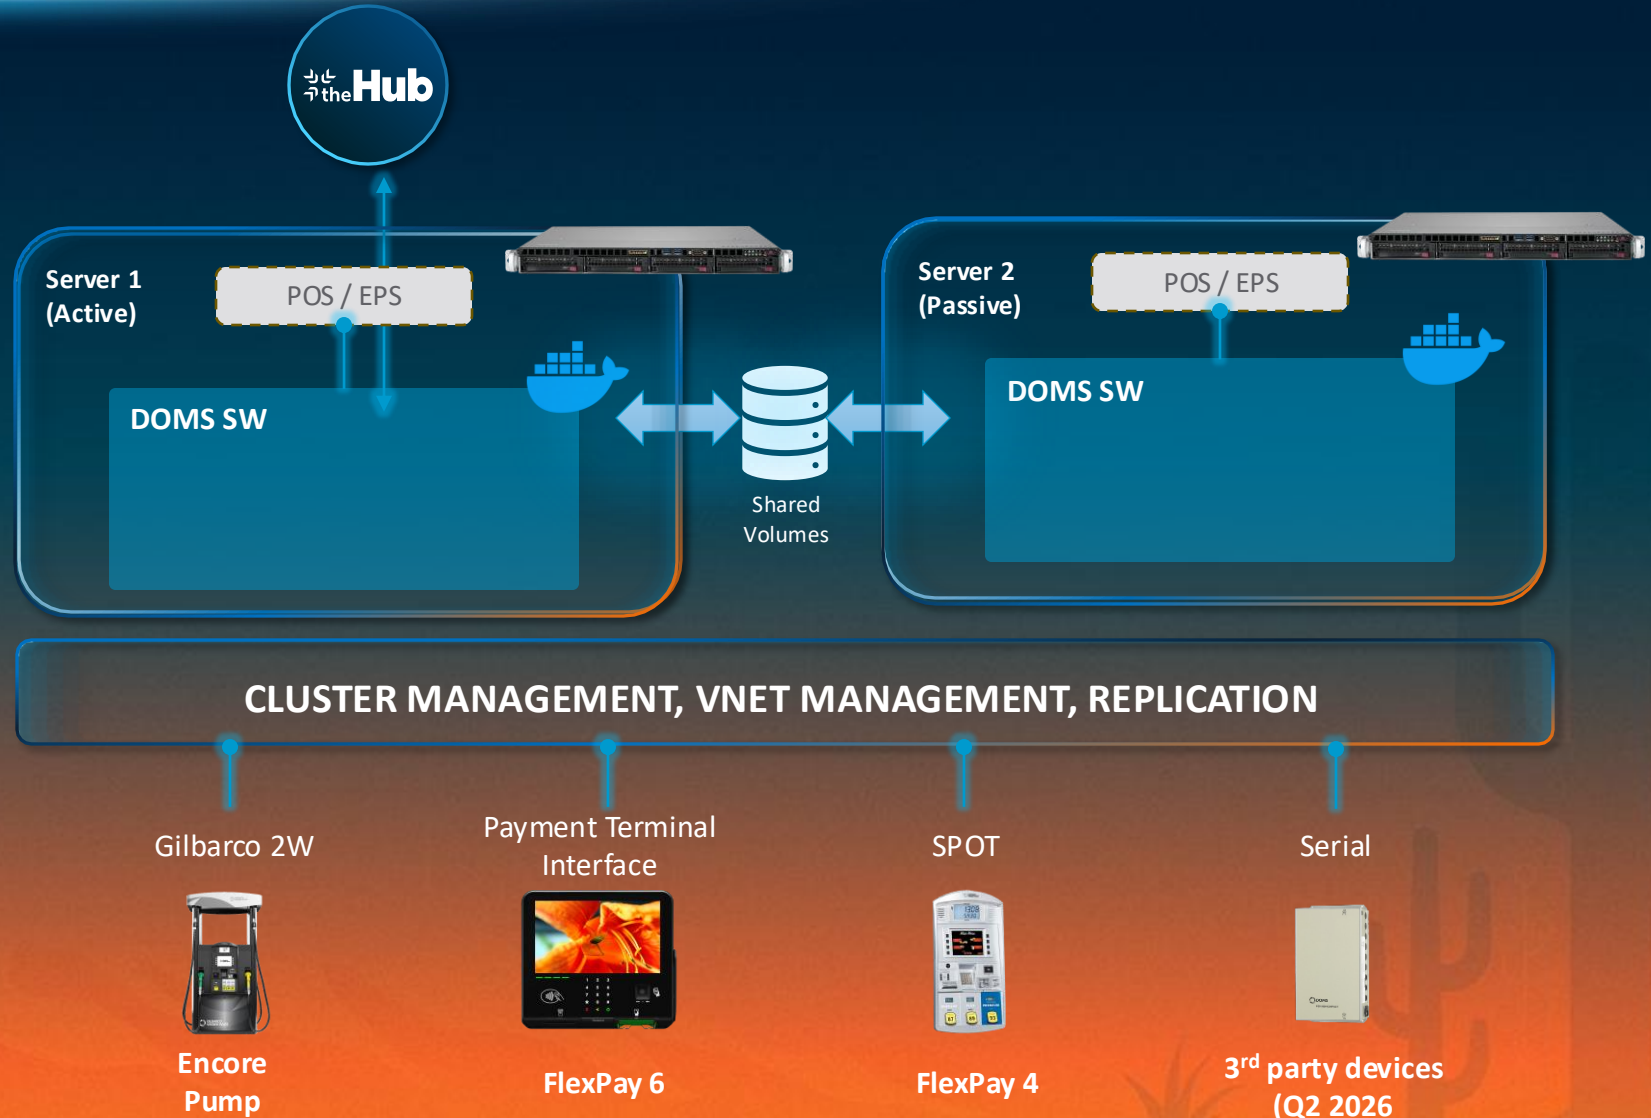

- Pump and ATG control running on Edge Platform with failover
- Gilbarco pumps (Ethernet)
- Payment terminal interface to Flexpay 6 & Flexpay 4
- VR ATG (Ethernet)
- Web based configuration

In-development

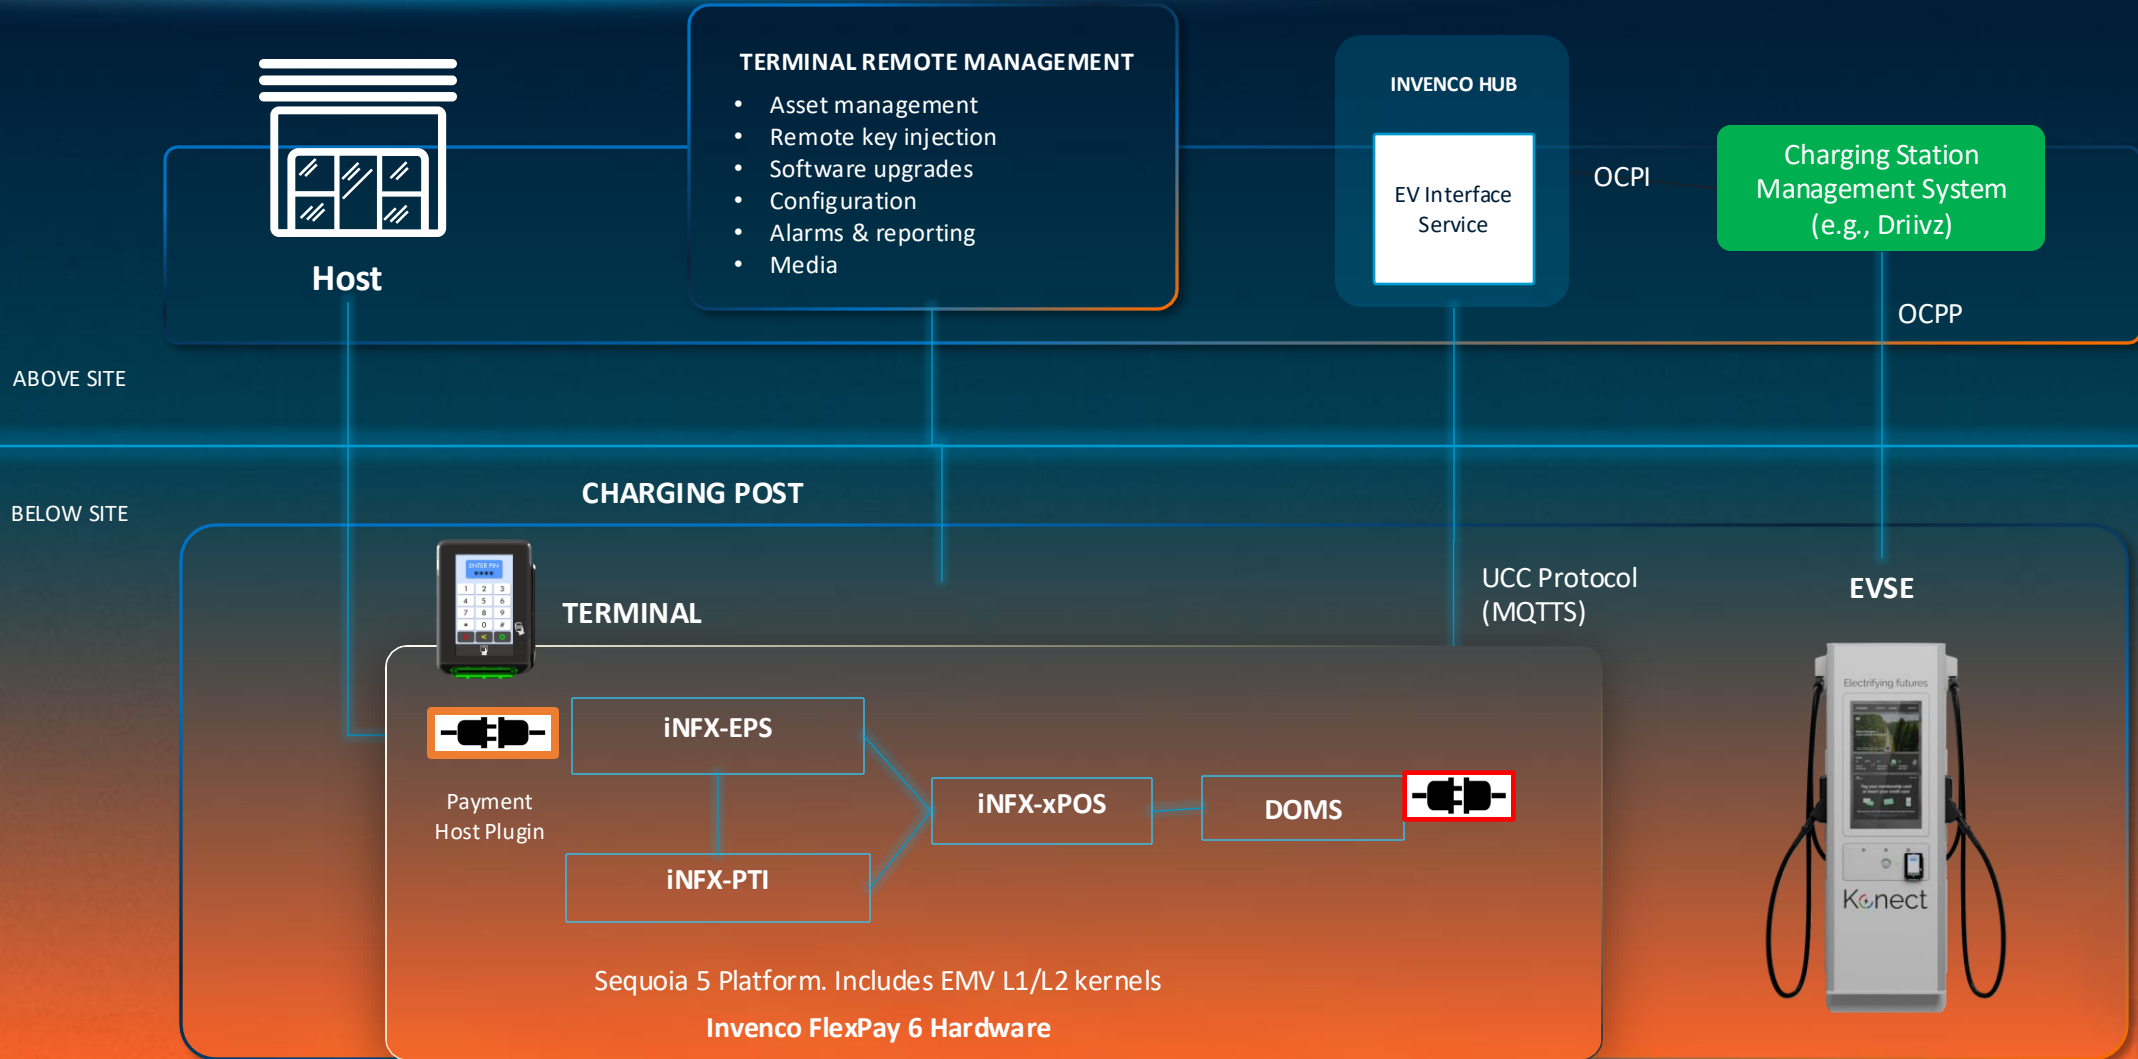

- Serial-to-ethernet convertor – unlock Wayne or other legacy serial devices (Q2)

POS Support

- Passport
- GK Software (in-development)
- NCR Voyix (in-development)
- Any POS that supports DOMS today (Most outside of US POS providers)

Distributed Deployment
