

End of Sale Notification

Mechanical Dispenser Interface Module (MDIM)

Overview

Due to the lack of availability of several components required to manufacture and support the MDIM, **Veeder-Root has determined that it has reached End of Sale (EOS), and the following parts listed in the table below are no longer available.**

This End of Sale is effective immediately.

The MDIM is used with the TLS-450PLUS and TLS4 with TLS-XB, to collect sales data from mechanical dispensers, enabling customers to perform Business Inventory Reconciliation (BIR)/AccuChart™ functions. Several communication options remain available for BIR/AccuChart, and customers are encouraged to contact Technical Support or their local Territory Sales Manager to discuss their specific application needs.

► Impacted Equipment

Part Number	Description
0333582-001	BIR / AccuChart MDIM 12 Inputs – Factory Installed
0330020-799	BIR / AccuChart MDIM 12 Inputs – Upgrade Kit
0330020-681	BIR / AccuChart MDIM 12 Inputs – Spare Part

► Additional Information

Existing installed MDIMs for the TLS-450PLUS and TLS4 may continue to be used in the field following the End of Sale communication date. While these products will no longer be available for purchase, Veeder-Root remains committed to supporting customers with technical assistance for installed systems.

Customers with questions regarding this notification, installed MDIM applications, BIR/AccuChart communication options, product availability, or future planning are encouraged to contact Technical Support. Our team is available to help evaluate your specific application and provide guidance as needed.
