Software Release Version 11.G

TLS-450PLUS and TLS4 Series Consoles

For Immediate Release

Version 11.G software is now available for TLS-450PLUS and TLS4 Series Automatic Tank Gauges (ATGs). This release enhances In-Station Diagnostics (ISD) by adding Containment Monitoring capabilities and expanding ullage pressure data, reporting, and display.

Key Enhancements Supporting Version 11.G

Enhanced ISD and Containment Monitoring (for TLS-450PLUS Only)

- Removed ISD Gross and Degradation pressure alarm criteria (CP-201).
- Added storage of 14 days of ullage pressure and volume data.
- Added a new monthly ullage pressure report covering the past 12 months.

Improved Daily Details Report

- Ullage pressure shown to two decimal places.
- Year added to the date (MM/DD/YY or MM/DD/YYYY).

Simplified Configuration and Display

- VST Green Machine removed from Vapor Processor selection.
- Stage 1 removed from the GUI, web, printouts, and RS-232 command.

Note: No changes to leak and A/L calculations or assessment results.
