VEEDER-ROOT

Timed Sudden Loss Detection

For TLS-450PLUS and TLS4 Series Automatic Tank Gauges

Gain peace of mind by continuously monitoring for inventory loss due to theft, during quiet periods at your site(s). With the Veeder-Root TLS-450PLUS and TLS4 Series Automatic Tank Gauges (ATGs), you can set programmable schedules to notify you when changes in inventory are detected.

▶ FEATURES

- User defined monitoring periods
- Custom configuration via GUI, web-enabled or RS-232 command
- Programmable threshold for alarm trigger
- System will signal alarm once inventory loss exceeds threshold [1]
- Ability to acknowledge alarm and restart monitoring
- Receive notification of changes in inventory during user defined quiet periods
- Available software enhancement on TLS-450PLUS and TLS4 series consoles

[1] *Default threshold 99.9 gallons*
