

# PC/1000 UPGRADE PROCEDURE

This document contains the procedure for upgrading from the PC/1000 for Windows Version 1.0x to version 1.0.

## UPGRADING FROM PC/1000 VERSION 1.0X TO PC/1000 VERSION 1.0

To upgrade PC/1000 and related files, perform the following steps:

### Step 1: Make a Backup

Make a system backup of the current PC/1000 database on a disk separate from the normal backup. (see the **Utilities function in the PC/1000 package**). Make absolutely sure of your backup!

### Step 2: Print the PC System Configuration Report

Select the **Reports** function from the package main page and then select and print your PC System Configuration report. You will use this report later in step 7.

### Step 3: Exit PC/1000

Exit PC/1000 and all other Windows applications.

### Step 4: Shut Down Interbase Server

The Interbase Server must be shut down or stopped prior to PC/1000 installation/uninstallation.

**Windows 95/98/Me:** Right click on the Interbase Server icon in the lower right corner of the Windows Taskbar tray, and select **Shutdown**.

**Windows 2000/NT:** You must be logged-on to your PC as the **Administrator**. Click the **Start** button, click **Settings**, then **Control Panel**. Double click on the **Services** icon in Control Panel. Select **Interbase Server** from the list and click **Stop**. Follow the on-screen instructions.

### Step 5: Uninstall PC/1000 V1.0x

Uninstall PC/1000 V1.0x using **Add/Remove Programs**. Go to the Control Panel by clicking the **Start** button then clicking **Settings**, then **Control Panel**. Double click on the **Add/Remove Programs** icon in Control Panel. Select PC 1000 from the list of available programs to remove and then click the **Add/Remove** button. Follow the on-screen instructions. On the **Remove Shared file?** screen select the **Yes to All** button to ensure proper removal of the PC/1000 software.

### Step 6: Install PC/1000 V1.0

Follow the installation instructions on the inside of the CD box or in the PC/1000 V1.0 User's Guide.

### Step 7: Run PC/1000 V1.0

Start the PC/1000 application and select the **Help/About** function from within the package. The **Version** field should display "1.0". Select **OK** to close the About window and then select the **Utilities** function from the package main page. Now select **System Restore** and then **OK** when prompted "Do you want to continue?". Select the backup, which you performed in **Step 1** of this procedure and then select **Open**. When the restore is complete you should verify that all your previous **Fuel Site** and **Fuel Transaction** information has been inserted into the new package. You will have to manually re-enter and save your **System Owner** and **Communications Parameter** information. You can get this information from the PC System Configuration report you printed in Step 2.
