

Genuine Gilbarco®
Replacement and Rebuilt Parts

No one beats Genuine Gilbarco Quality!

✓ GILBARCO Vapor Pumps Other

- ✓ Replace ALL wearing components including vanes, shaft seals and bearings.
- ✓ All other components are carefully inspected and replaced with new components
- ✓ The only UL Recognized and CARB approved remanufactured Vapor Vac® pumps in the industry.
- ✗ Rebuilders do not replace all of the wearing parts. Gilbarco tests show failure up to 20% shortly after installation.
- ✗ Rebuilders use non-spec replacement parts.
- ✗ Rebuilders do not have UL or CARB approvals.

 Look for the UL label

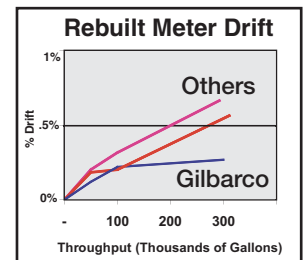

✓ GILBARCO Meters Other

- ✓ Same design and quality built into new Gilbarco pumps and dispensers.
- ✓ Built with new components, thoroughly leak-tested and calibrated for the highest performance standards right out of the box.
- ✓ Only Gilbarco rebuilt meters are UL Recognized and hold an NTEP Certificate of Conformance issued by the National Conference of Weights & Measures.
- ✗ Rebuilders use non-spec parts to rebuild meters, which will lead to calibration errors, lost revenue due to meter drift, and early failure.
- ✗ Rebuilders may overlook worn components and return meters without stringent leak testing and calibration.
- ✗ Rebuilders do not have Weights and Measures Certificates of Conformance, and no UL listing.

 Look for the UL label

✓ GILBARCO CRIND Printers Other

- ✓ CRIND printer chutes upgraded to reduce paper jams.
- ✗ Rebuilders do not upgrade with Gilbarco's latest engineering changes.

- ✓ Includes mandatory engineering changes to enhance performance and reliability.

- ✓ Printers must pass exact density and resolution tests to ensure the highest level of print quality.

- ✗ Rebuilders cannot upgrade to the current revision because they do not have access to required parts.

- ✗ Rebuilders may not recognize and correct problems indicated by poor print quality, such as this print defect caused by a stripped gear that will shortly fail.
