VEEDER-ROOT'S EVR EQUIPMENT TAKES THE PRESSURE OFF

LOWEST COST TO ACHIEVE EVR COMPLIANCE

Veeder-Root's EVR equipment has the lowest total installed cost of any certified system for most site configurations, starting with the shortest installation time and resulting in the least downtime.

LOWEST COST OF OWNERSHIP

Reduced maintenance requirements of Veeder-Root's balance system, resulting in time and cost savings.

- No expensive vac pumps to operate and maintain.
- No expensive assist nozzles to adjust and test.
- Reduced nozzle monitoring requirements.
- Veeder-Root's EVR equipment does not require weekly/monthly testing, which eliminates associated paperwork requirements and risk of fines.
- Annual testing rates are similar to other systems for most site configurations.

BEST FIT

Veeder-Root's EVR equipment provides 100% compliance with EVR regulations and deadlines.

- Aesthetically appealing system; smallest and most convenient to install and service.
- Minimum site disruption; fits on or next to your current vent stack.
- Easy permitting for most site configurations.

TRUST AND RELIABILITY OF VEEDER-ROOT

The most trusted brand in the industry, providing solutions that are less invasive and disruptive to your site, with its dedicated contractor network and highly trained technical support team.
