

PC/1000 VERSION 1.1.0.8 PATCH

The following instructions are for PC/1000 Patch installation under Microsoft Windows.

1. Turn on your computer and start Microsoft Windows.
2. Insert the GASBOY PC/1000 Patch CD-ROM into your CD ROM drive.
3. Click on the Start menu
4. Click on **Run**.
5. Type **D:\Setup**. (On most computers, the CD-ROM drive is D. If your CD-ROM drive is not D, type the appropriate letter.)
6. Click on OK.
7. Follow the on-screen instructions for installation. Setup will search your hard drive for the PC/1000 program and copy the necessary files to your PC. If PC/1000 cannot be found, or if multiple copies are found, you will be given an opportunity to manually search for it. If you are unable to locate PC/1000 on your system, the patch will not be able to continue.

IMPORTANT MODEM NOTE:

When installing this patch release, the **GBMODEM.INI** file will not be overwritten. If you need to use the new modems present in the patch release, you must manually copy the **GBMODEM.INI** file from the CD to your PC software directory.

- If you don't need the existing **GBMODEM.INI** file, simply copy the new file from the CD to the **\Program Files\Common Files\Gasboy** directory. Then remove the read-only property from the file (right click the file name, select **Properties** and uncheck the **Read-only** attribute).
- If you need to retain the existing **GBMODEM.INI** file, rename the existing file to **GBMODEMOLD.INI** and copy the new **GBMODEM.INI** file from the CD to the **\Program Files\Common Files\Gasboy** directory. Then remove the read-only property from the file (right click the file name, select **Properties** and uncheck the **Read-only** attribute). Use an editor to open the **GBMODEMOLD.INI** file and use cut and paste to add any changes to the new **GBMODEM.INI** file.
